DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Arnold (U.S. 2,083,935).

Arnold discloses a glove comprising: a palmar side panel and a dorsal side panel secured along each panel's outer periphery with an opening therein to receive a human hand, said dorsal side panel being sized to cover the back of said hand and in conjunction with said palmar side panel providing a thumb stall and a plurality of finger stalls for receiving a thumb and fingers of a human hand; a thumb ulnar protective padding disposed along said thumb stall and a palmar protective padding.

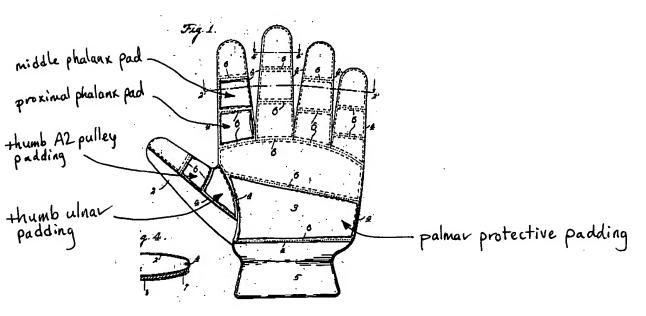

However, Arnold does not state that the thumb ulnar protective padding is adapted to be positioned along an ulnar border of the thumb proximal phalanx between the metacarpalphalangeal joint and a proximal interphalangeal joint nor does Arnold state that the palmar protective padding overlies at least the distal halves of an index finger and a long finger metacarpals excluding the metacarpalphalangeal joints of the index and long finger.

Application/Control Number: 10/670,859

Art Unit: 3765

As shown in the figure of Arnold, protective padding 3 is positioned in the palm portion of the glove and will overlie at least the distal halves of an index finger and a long finger metacarpals and not overlie the metacarpalphalangeal joints of the index finger and long finger. Furthermore, as shown in the figure, protective padding is positioned along the thumb stall and is adapted to be positioned along an ulnar border of the thumb proximal phalanx between a metacarpalphalangeal joint and a proximal interphalangeal joint.

Note: The intended use of the glove of Arnold is to protect a user's hand from heat/burn via material placed in the pockets 7. However, the glove of Arnold also has the capability of protecting a user's hand from shock and vibration since the cork material has the capability of absorbing impact (see figure below).

With regard to claim 2, a thumb A2 pulley padding disposed along said thumb stall at a location adapted to be over said thumb proximal phalanx between said metacarpalphalangeal joint and said interphalangeal joint.

With regard to claim 3, a proximal phalanx padding over at least the proximal phalanx of said index finger between the metacarpalphalangeal joint and the center axis of rotation of the interphalangeal joint.

With regard to claim 4, padding covering at least further including middle phalanx the middle phalanx of said index finger above the proximal interphalangeal joint and below the center axis of rotation of the distal interphalangeal joint.

With regard to claim 5, a thumb metacarpal pad overlying the thumb metacarpal between the center axis of rotation of the metacarpalphalangeal joint and the carpometacarpal joint.

With regard to claims 6-10, the invention is disclosed in one or more of the above rejected claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Rawlings '968, Webster '690, Gordon et al. '839, Fabry '799, Mah '809 and Gold '290 discloses various gloves having palmar padding and thumb padding.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary L. Welch whose telephone number is (703) 305-0451. The examiner can normally be reached on Mon-Fri 5:30-3:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John J. Calvert can be reached on (703) 305-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
